Penesku, F. (Doctor)ORG: M.T.Tc. Polyclinic, Ploiesti (Policlinica M.T.Tc.); "16 February" Kindergarten,  
Ploiesti (Gradinita de copii "16 Februarie")TITLE: Clinical aspects of eruptive diseases of undetermined etiology occurring  
during a measles epidemic

SOURCE: Microbiologia, parazitologia si epidemiologia, v. 10, no. 4, 1965, 365-371

TOPIC TAGS: clinical medicine, infective disease, epidemiology

ABSTRACT: A description of some unusual, atypical clinical features observed in 344 cases during a measles' epidemic. The authors suggest as probable a clinical diagnosis of infectious erythema, based on the characteristics of the eruption (polymorphism, symmetry, lability and topography) as well as on the fact that 38 children had a typical measles attack during convalescence and 63 others had had it previously.

WEATHER. Glassware survival in glaciogenesis/deglaciation study

Sovnuk robot no slushpole No. 2 (collection of articles on Synoptics, or 2).

Leningrad, Glacioclimatic, 1958, 457 p., 1,000 copies printed.

Ed. (Title page); G. D. Zubryev Ed. (Inside book); R. V. Gromov Tech. Eds.;

A. N. Semyonov.

PURPOSE: This collection of articles is intended for meteorologists.

CONTENTS: This book contains 12 abridged articles written by synoptic meteorologists of the Weather Bureau, the Glacioclimatic, and the Aeronautical Weather Station of the Civil Air Fleet). All articles deal with the local features in the development of atmospheric processes and weather. There are no personalities mentioned. There are 35 references. The Soviet and 1 German.

Orig Pub : Nauchn. tr. Vissh. in-t khranit. i vikus. prom-st. Plovdiv,  
1956, 3, 181-200  
  
Abstract : Cheese of type 83 (C), made from sheep's milk, contains  
in addition more than 0.8% of soluble proteins, due to  
the fact that prior to the fermentation the milk is  
heated to 83°. With a moisture content of 53% the C con-  
tains 22.5% fat and 15.6% proteins. From 100 liters of  
milk with a fat content of 6.5% the yield of ripe cheese  
is 28 kg. Composition of C is not the same in its diffe-  
rent layers since the curds are not comminuted during  
the manufacturing process. The bottom layers of the C
